[info] Test case passed

- Caso de prueba fallido para evitar falso positivo con "Artículo no encontrado"

The screenshot displays the Katalon Recorder 7.1.0 interface. On the left, a sidebar shows a 'Test Suites' section with a search bar and a 'Test Cases' section with a list of test cases: 'ArticleSearch\_SuccessCode', 'ArticleSearch\_NotFoundCode', and 'ArticleSearch\_InvalidCode'. The main workspace is titled 'Untitled Test Case' and contains a table with the following data:

| Command       | Target                             | Value         |
|---------------|------------------------------------|---------------|
| open          | https://am-2023-articulos.bey.sau/ |               |
| click         | id-code                            |               |
| type          | id-code                            | 1111111111112 |
| click         | id-search                          |               |
| assertVisible | id-article-price                   |               |

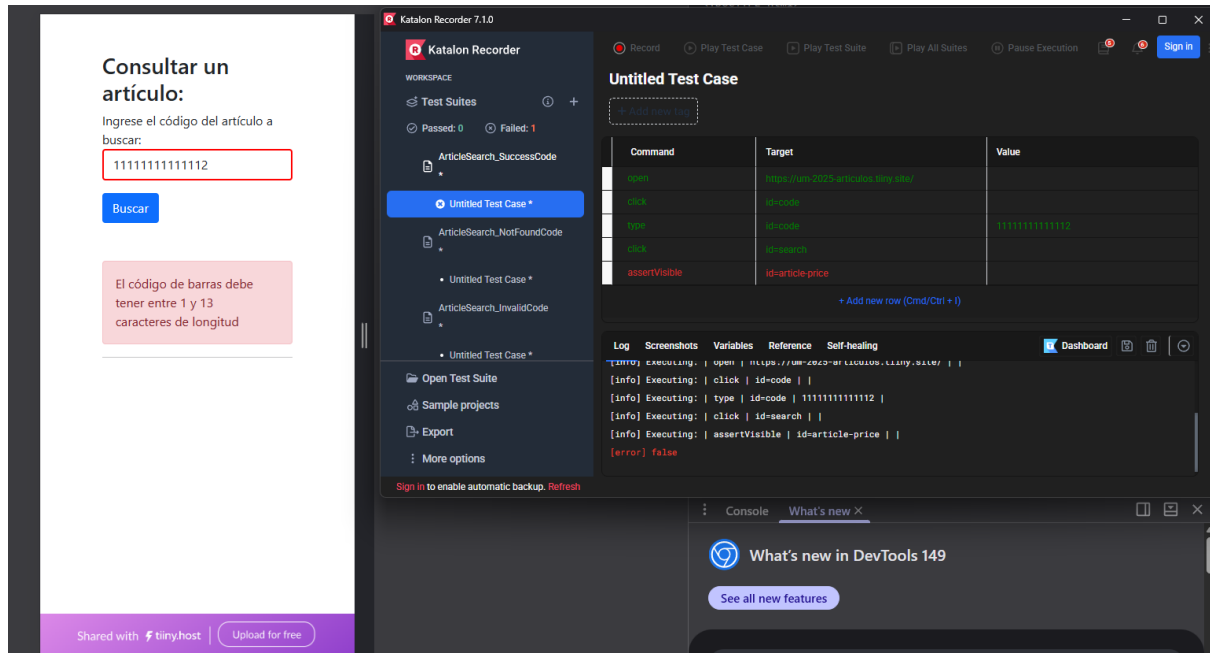

Below the table, there is a button to 'Add new row (Cmd/Ctrl + I)'. At the bottom, a console window shows the following logs:

```
[error] Executing: | open | https://am-2023-articulos.bey.sau/ | |
[info] Executing: | click | id-code | |
[info] Executing: | type | id-code | 1111111111112 |
[info] Executing: | click | id-search | |
[info] Executing: | assertVisible | id-article-price | |
[error] false
```

## Trabajo Practico N°3 Aseguramiento de calidad de software

### C. Código erróneo

- Caso de prueba exitoso

The screenshot displays the Katalon Recorder interface with a test suite named 'Untitled Test Case'. The test suite is marked as 'Passed: 1' and 'Failed: 0'. The test case steps are as follows:

| Command              | Target                          | Value                                                              |
|----------------------|---------------------------------|--------------------------------------------------------------------|
| open                 | https://www.2025-articulos.com/ |                                                                    |
| click                | id=code                         |                                                                    |
| type                 | id=code                         | 1111111111122                                                      |
| click                | id=search                       |                                                                    |
| assertVisible        | id=alert                        |                                                                    |
| verifyText           | id=alert                        | El código de barras debe tener entre 1 y 13 caracteres de longitud |
| assertElementPresent | css=#code.required              |                                                                    |

The log shows the following execution steps:

```
[info] Executing: | click | id=code | |
[info] Executing: | type | id=code | 1111111111122 |
[info] Executing: | click | id=search | |
[info] Executing: | assertVisible | id=alert | |
[info] Executing: | verifyText | id=alert | El código de barras debe tener entre 1 y 13 caracteres de longitud |
[info] Executing: | assertElementPresent | css=#code.required | |
[info] Time: Wed Jun 19 2026 11:14:36 GMT-0300 (hora estándar de Argentina) Timestamp: 178118876842
[info] Test case passed
```

- Caso de prueba fallido para evitar falso positivo con “Artículo encontrado”

The screenshot displays the Katalon Recorder interface with a test suite named 'Untitled Test Case'. The test suite is marked as 'Passed: 0' and 'Failed: 1'. The test case steps are as follows:

| Command              | Target                          | Value                                                              |
|----------------------|---------------------------------|--------------------------------------------------------------------|
| open                 | https://www.2025-articulos.com/ |                                                                    |
| click                | id=code                         |                                                                    |
| type                 | id=code                         | 1111111111111                                                      |
| click                | id=search                       |                                                                    |
| assertVisible        | id=alert                        |                                                                    |
| verifyText           | id=alert                        | El código de barras debe tener entre 1 y 13 caracteres de longitud |
| assertElementPresent | css=#code.required              |                                                                    |

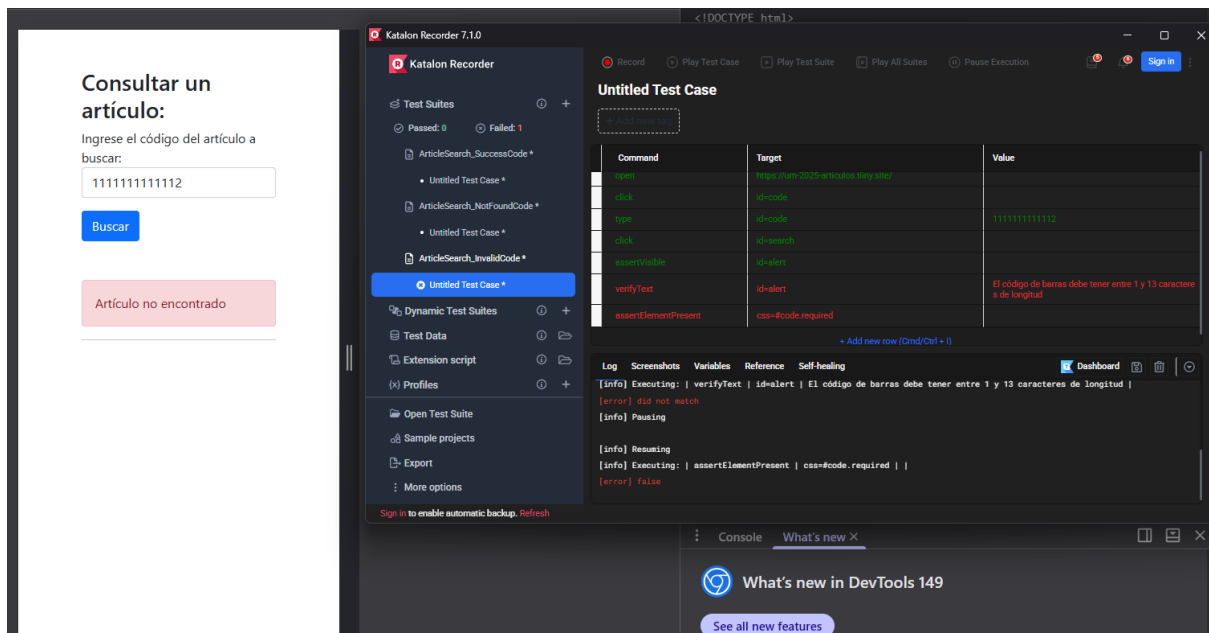

The log shows the following execution steps:

```
[info] Executing: | verifyText | id=alert | El código de barras debe tener entre 1 y 13 caracteres de longitud |
[error] did not match
[info] Pausing
[info] Resuming
[info] Executing: | assertElementPresent | css=#code.required | |
[error] false
```

Alumno: Javier Sepúlveda
